

myMBU v1.2.2

Date	Jun 16, 2017
Issues	4 issues

Summary

- Addition of a modal that is presented upon login (once per browser session) for users who do not have a personal email address (`Email2`) on file in CAMS. The modal allows for the user to submit an email address or dismiss the notification.
- A news item has also been added in the banner with a link to re-open the modal, if desired.
- If the user updates their personal email, they will be presented with a "thank you" message.
- If a user has a personal email on file, they will not see any option to update this information. It is only for those without an `Email2` on file.

All updates for this release

Bug
